

# VersEseal

**SPRAYABLE MULTI-PURPOSE  
SEALANT**

## Product Overview

VersEseal is an environmentally safe, volatile organic compound (VOC) free and potable water approved membrane. It is used to provide a fully adhered seamless waterproof membrane for concrete repair and sealing, waterproofing, plumbing, foundation sealing, waste water storage, pipe and sewerage lining, as well as water tank and reservoir repair or sealing.

VersEseal Quick Set is used for even coverage over large areas. It is progressively applied using a hand-held spray gun to a range of thicknesses to provide a seamless finish and sets within a few hours. Once applied, VersEseal Quick Set becomes a completely waterproof, durable and highly flexible membrane strong enough to last for years in the harsh Australian climate.

VersEseal Rapid Build is used as an initial coverage system over joints, penetrations and other substrate imperfections. As it dries slower than Quick Set, it is applied to surfaces with a brush, roller or spray system and facilitates the bonding of geotextile fabric to the surface to create a membrane. Quick Set is then often applied over the top to provide a seamless finish. Rapid Build can also be used as a two pack application for both residential and commercial purposes.

VersEseal Bulk Build is used as a standalone solution to repair and seal damaged, cracked or leaking areas where a more viscous product is required to ensure that the application dries properly. Bulk Build complements the LRM Products' range by sealing extensive damage prior to Rapid Build and Quick Set applications. Bulk Build is applied to problem areas typically using a trowel.

## Quick Facts

- Allows for thicker coverage of areas
- Spray on application provides the shortest and most efficient application time
- Fast curing
- Excellent surface adhesion – including to damaged areas
- Excellent resistance to temperature variations
- Excellent sealing properties (leak proof)
- Resistant to ultraviolet radiation
- Excellent elongation (over 850%) and recovery properties
