VersEseal

Box Gutter Kit Application Guide

Health and Safety

VersEseal Rapid Build is water based however, gloves, eye protection and overalls are recommended. Please read the full Safety Data Sheet before use.

If the roof is used for water collection, allow 10 days curing and discard the first two rains or rinses.

Application Guidelines

1. Wash down to remove all dirt, a pressure washer is ideal for this (1000 to 3000psi), and allow to dry.
2. Treat any areas of rust with a water based rust converter according to manufacturers instructions. Wash again to remove any excess residue.
3. Lightly abrade the surface to maximise adhesion, use a medium grit sand paper. Wipe with damp cloth to remove sanding dust.
4. Use masking tape to give a clean edge to areas which are not to be coated. PRO TIP: Remove masking tape while the coating is still wet and re-mask for each coat.
5. If gaps over 1.5mm are needed to be bridged use Geofabric and Rapid Build or VersEseal Rubber Caulk to bridge the gap.
6. Pre-cut geofabric to size before starting to coat the membrane.
7. Apply first coat of VersEseal Rapid Build with a Brush or Roller. Aim for a good thick coating.
8. Lay Geofabric Bandage into wet coating, take time to smooth the geofabric and ensure there are no creases.
9. Immediately apply a second coat of VersEseal Rapid Build with a brush aiming again for another good thick coating.
10. Allow coating to dry, this will typically take 4 hours at 25C and good ventilation.
11. Apply a third good thick coat of VersEseal Rapid Build to achieve a final Wet Film Thickness (WFT) of a minimum of 1mm and allow to dry.

Note: This is a water based VOC Free coating system, DO NOT apply if rain or heavy dew are expected. Apply between 10C and 30C. Avoid applying during the hottest part of the day. If applying in high temperature or direct sunshine use thin coats and extra layers to avoid bubbling of the membrane prior to it curing.

For Cleaning up, use mineral turpentine to clean VersEseal Rapid Build from hard surfaces, use Baby Oil (Mineral oil) to clean from skin.
